[0764856885](tel:0764856885) • mqssranqajeewa@gmail.com • [Github](#) • [Linkedin](#) • bio.shazee.dev

PROFESSIONAL SUMMARY

Software Engineering student (BSc in progress) with hands-on experience building full-stack web applications and responsive UIs. Strong fundamentals in Object-Oriented Programming (OOP), data structures, and RESTful APIs. Practical experience with backend services, relational databases (MySQL), and frontend component development. Quick to learn and eager to apply AI-assisted engineering tools to accelerate development.

TECHNICAL SKILLS

- Languages: Java, JavaScript, PHP, SQL; currently learning C# and TypeScript
- Frontend: React.js, HTML, CSS, Tailwind, Framer Motion, GSAP; familiar with Angular concepts
- Backend: RESTful APIs, Express/Node, Hibernate, ASP.NET Core (learning)
- Databases: MySQL, MongoDB, SQL queries, DBMS concepts, relational schema design
- Tools & Practices: Git, GitHub, Visual Studio Code, Visual Studio, Agile, CI/CD concepts, code review
- AI-assisted dev: Experience exploring ChatGPT and GitHub Copilot for coding and testing workflows

EDUCATION

BSc Software Engineering — Birmingham City University (expected 2027)

Advanced Course in Graphic Design & UI/UX — Academy Of Graphics (2023)

Advanced Level Exams (Physical Science – C, C, S) — D S Senanayake College (2023)

Ordinary Level Exams (9A's) - D S Senanayake College (2020)

SELECTED PROJECTS

[Modern E-Commerce](#) (PHP) — Frontend & UX

- Developed a modern eCommerce website for an electronics store featuring original design, smooth scrolling, loaders, and an intuitive user experience with a PHP backend.

[Fashion E-Commerce](#) — (Java, MySQL - Hibernate)

- Developed a premium fashion e-commerce platform using Java, MySQL, and Hibernate, creating a fast, stable, and scalable online shopping experience with category filtering, secure checkout, and optimized product management.
- Designed a fully responsive user interface with fast-loading high-quality visuals and built an admin dashboard for real-time order tracking and inventory management, improving usability for both customers and store owners across all device sizes.

[Creative Portfolio](#) (GSAP) — Frontend (React)

- Developed a modern, visually engaging personal portfolio website showcasing skills, projects, and personality as a creative developer, featuring a contemporary user interface, animations, and fully responsive design to ensure

seamless experience across devices while emphasizing interactivity and creativity to reflect technical skill and creative thinking

[Hotel WordPress Site](#)

- Built a fully responsive WordPress website for a 5-star hospitality and banqueting venue, demonstrating expertise in WordPress theme customization and plugin integration
- Implemented custom page builder layouts using Elementor/Gutenberg to create dedicated sections for events, venues, gallery, reviews, and enquiry forms optimizing for conversions
- Structured multi-page experience with clean, semantic HTML and responsive CSS ensuring seamless experience across all devices (mobile, tablet, desktop)
- Configured domain registration, DNS settings, and hosting deployment ensuring proper site accessibility and email routing

[Software Agency Website](#)

- Developed a comprehensive UI/UX system with modern typography, neon-inspired branding, project showcases, testimonials, and service sections, enhancing visual hierarchy, consistency, and front-end usability through organized design systems and collaborative workflows
- Created and prototyped a futuristic agency portfolio website in Figma, utilizing Auto Layout, components, variants, grids, reusable styles, and interactive prototyping to develop a responsive and visually engaging user interface

[Virtual Event Platform](#)

- Developed a high-fidelity mobile interface for a real-time event sharing application, focusing on a clean, modern aesthetic with a consistent "Mac Dark" inspired color palette.
- Optimized user flows for event discovery and creation, implementing a streamlined "Quick Menu" and QR scanning functionality to enhance accessibility and user engagement.

[GitHub Projects](#) - More Awesome Projects

[Portfolio Link](#) - Personal Portfolio Website

RELEVANT EXPERIENCE & RESPONSIBILITIES

- Implemented features and resolved bugs across frontend UI and backend APIs in collaborative teams.
- Built and consumed REST APIs; prepared and validated data for backend features and testing.
- Designed responsive UI components and collaborated on UI/UX decisions with stakeholders.
- Performed testing, debugging, and troubleshooting across stacks.
- Participated in Git-based code reviews and Agile ceremonies.

KEY ACHIEVEMENTS

- Delivered production-ready e-commerce features with measurable performance improvements.
- Implemented admin dashboard features enabling real-time order tracking and simplified inventory flows.

WHY I FIT

- Solid foundations in OOP, data structures, and software engineering principles from coursework and projects.
- Practical backend API and relational DB experience transferable to C#/.NET development.

- Frontend component experience and ability to learn Angular/TypeScript quickly.
- Familiar with VS Code, Git, Agile, REST APIs, and CI/CD concepts.
- Enthusiastic about AI-assisted development and validation of AI-driven features.

PROFESSIONAL SUMMARY

Full-Stack Developer and Software Engineering student skilled in building high-quality, responsive web applications with modern UI/UX design. Proficient in Java, React.js, Node.js, GSAP animations, and RESTful API development, with certified expertise in scalable back-end and creative front-end solutions.

FEATURED PROJECTS

Modern E-Commerce (PHP) [\[Live Project\]](#)

- Developed a modern eCommerce website for an electronics store featuring original design, smooth scrolling, loaders, and an intuitive user experience with a PHP backend.

Creative Portfolio (GSAP) [\[Live Project\]](#)

- Developed a modern, visually engaging personal portfolio website showcasing skills, projects, and personality as a creative developer, featuring a contemporary user interface, animations, and fully responsive design to ensure seamless experience across devices while emphasizing interactivity and creativity to reflect technical skill and creative thinking

Fashion E-Commerce (JAVA EE) [\[Live Project\]](#)

- Developed a premium fashion e-commerce platform using Java, MySQL, and Hibernate, creating a fast, stable, and scalable online shopping experience with category filtering, secure checkout, and optimized product management.
- Designed a fully responsive user interface with fast-loading high-quality visuals and built an admin dashboard for real-time order tracking and inventory management, improving usability for both customers and store owners across all device sizes.

Hotel WordPress Site (WordPress) [\[Live Project\]](#)

- Built a fully responsive WordPress website for a 5-star hospitality and banqueting venue, demonstrating expertise in WordPress theme customization and plugin integration
- Implemented custom page builder layouts using Elementor/Gutenberg to create dedicated sections for events, venues, gallery, reviews, and enquiry forms optimizing for conversions
- Structured multi-page experience with clean, semantic HTML and responsive CSS ensuring seamless experience across all devices (mobile, tablet, desktop)
- Configured domain registration, DNS settings, and hosting deployment ensuring proper site accessibility and email routing
- Integrated third-party tools including booking systems, review platforms, and contact form APIs within WordPress environment
- Optimized WordPress site for SEO and performance using caching strategies, image optimization, and speed improvements to enhance user experience and search rankings
- Implemented WordPress security best practices including SSL configuration, backup automation, and regular update management

Software Agency Website [\[Live Project\]](#)

- Developed a comprehensive UI/UX system with modern typography, neon-inspired branding, project showcases, testimonials, and service sections, enhancing visual hierarchy, consistency, and front-end usability through organized design systems and collaborative workflows
- Created and prototyped a futuristic agency portfolio website in Figma, utilizing Auto Layout, components, variants, grids, reusable styles, and interactive prototyping to develop a responsive and visually engaging user interface

Virtual Event Platform [\[Live Project\]](#)

- Developed a high-fidelity mobile interface for a real-time event sharing application, focusing on a clean, modern aesthetic with a consistent "Mac Dark" inspired color palette.
- Optimized user flows for event discovery and creation, implementing a streamlined "Quick Menu" and QR scanning functionality to enhance accessibility and user engagement.

Land Surveying Agency [\[Live Project\]](#)

- Designed a high-fidelity design system featuring custom iconography, distinct bento-grid layouts, and consistent color tokens for a professional surveying firm.
- Responsive layouts using Figma constraints and Auto Layout to bridge complex desktop bento-grids with streamlined, mobile-first vertical stacks.
- Designed interactive component libraries for service cards and location modules, optimizing user navigation for multi-city contact information and service offerings.

PROFESSIONAL SUMMARY

WordPress Developer with hands-on experience in designing, developing, and maintaining fully responsive WordPress websites. Proficient in WordPress themes, plugins, customization, and page builders (Elementor, Gutenberg) with strong expertise in HTML, CSS, responsive design, and RESTful API integration. Skilled in deploying websites across hosting platforms, managing domains/DNS, and optimizing sites for performance, SEO, and security. Proven ability to collaborate with designers and marketing teams while managing multiple projects and meeting strict deadlines.

FEATURED PROJECTS

[Hotel WordPress Site](#)

- Built a fully responsive WordPress website for a 5-star hospitality and banqueting venue, demonstrating expertise in WordPress theme customization and plugin integration
- Implemented custom page builder layouts using Elementor/Gutenberg to create dedicated sections for events, venues, gallery, reviews, and enquiry forms optimizing for conversions
- Structured multi-page experience with clean, semantic HTML and responsive CSS ensuring seamless experience across all devices (mobile, tablet, desktop)
- Configured domain registration, DNS settings, and hosting deployment ensuring proper site accessibility and email routing

- Optimized WordPress site for SEO and performance using caching strategies, image optimization, and speed improvements to enhance user experience and search rankings
- Implemented WordPress security best practices including SSL configuration, backup automation, and regular update management

[Creative Portfolio Website](#)

- Developed a modern, visually engaging personal portfolio website using WordPress showcasing projects with fully responsive design across all devices
- Customized WordPress theme and integrated custom post types to display portfolio projects, skills, and achievements
- Optimized site performance and implemented responsive CSS media queries ensuring fast load times and seamless experience on mobile, tablet, and desktop

[Modern E-Commerce Platform](#)

- Contributed to responsive web development utilizing HTML, CSS, and JavaScript ensuring consistent user experience across multiple browsers and devices
- Implemented modern UI/UX design with smooth interactions and optimized performance

[Software Agency Website](#)

- Created a cohesive design system (typography, spacing, color tokens, components) and high-fidelity prototypes in Figma.
- Used Auto Layout, components with variants, and constraints to ensure responsive behavior across breakpoints.
- Delivered component library and export-ready assets for developers, including SVGs, CSS snippets, and spec documentation.

Fashion E-Commerce Platform

- Developed full-stack e-commerce platform demonstrating understanding of database management and responsive UI/UX design principles
- Designed fully responsive user interface with fast-loading visuals and created admin dashboard for real-time management

EDUCATION

Birmingham City University, UK	2027
Bachelor of Science in Software Engineering

[0764856885](tel:0764856885) • mqssrangajeewa@gmail.com • [GitHub](#) • [LinkedIn](#) • [bio.shazee.dev](#)

PROFESSIONAL SUMMARY

UI/UX Designer and Software Engineering student with hands-on experience delivering user-centered web and mobile interfaces. Strong practical proficiency in Figma (Auto Layout, components, variants, and prototyping), design systems, responsive layouts, and developer-friendly asset handoffs. Skilled at translating stakeholder requirements into wireframes, user flows and high-fidelity designs, then iterating designs from feedback to meet deadlines.

HIGHLIGHTED UI/UX EXPERIENCE

Software Agency Website - Design System & Prototyping

- Created a cohesive design system (typography, spacing, color tokens, components) and high-fidelity prototypes in Figma.
- Used Auto Layout, components with variants, and constraints to ensure responsive behavior across breakpoints.
- Delivered component library and export-ready assets for developers, including SVGs, CSS snippets, and spec documentation.

Virtual Event Platform - UI/UX Design & Mobile Prototyping

- Developed a high-fidelity mobile interface for a real-time event sharing application, focusing on a clean, modern aesthetic with a consistent "Mac Dark" inspired color palette.
- Optimized user flows for event discovery and creation, implementing a streamlined "Quick Menu" and QR scanning functionality to enhance accessibility and user engagement.

Land Surveying Agency - Responsive Web Design & Prototyping

- Designed a high-fidelity design system featuring custom iconography, distinct bento-grid layouts, and consistent color tokens for a professional surveying firm.
- Responsive layouts using Figma constraints and Auto Layout to bridge complex desktop bento-grids with streamlined, mobile-first vertical stacks.
- Designed interactive component libraries for service cards and location modules, optimizing user navigation for multi-city contact information and service offerings.

Creative Portfolio - Interaction & Prototyping

- Designed interactive case studies and micro-interactions (GSAP prototypes translated into Figma flows) to communicate animation intent and UX rationale.
- Built clickable prototypes to test user flows and present outcomes to stakeholders.

Modern E-Commerce - UX Flows & Usability

- Led wireframing and user flow definition for product discovery and checkout.
- Iterated on layouts after stakeholder and usability feedback to reduce cognitive load and streamline conversion paths.

Hotel WordPress Site - Client Collaboration & Iteration

- Conducted requirement gathering with client, produced wireframes and multiple visual concepts, and iterated based on user feedback.
- Ensured consistency with brand guidelines and delivered developer-ready specs and assets.

[GitHub Projects](#) - More Awesome Projects

[Portfolio Link](#) - Personal Portfolio Website

CORE SKILLS

- Figma: Auto Layout, components & variants, prototyping
- UX: wireframing, user flows, usability best practices, accessibility basics
- Visual: responsive layout, typography, color systems, iconography and asset optimization (SVG)
- Handoff: export-ready assets, annotations, CSS snippets, naming conventions
- Tools: Git, Figma, Tailwind CSS (for dev handoffs), basic HTML/CSS, GSAP (interaction reference)

EDUCATION

Bachelor of Science in Software Engineering — Birmingham City University, UK (expected 2027)

Course in Web Design and WordPress Development — LK Domain Registry (2025)

Advanced Course in Graphic Design & UI/UX — Academy of Graphics (2023)

Advanced Level Exams (Physical Science Stream) – C, C, S (2023)

Ordinary Level Exams – 9A's (2020)

RELEVANT ATTRIBUTES

- Clear presenter of ideas: confident presenting design choices and usability findings to clients and development teams.
- Time management: able to prioritize tasks, meet project deadlines, and scope design phases for efficient delivery in freelance and agency contexts.
- Attention to detail: rigorous about component consistency, spacing, and accessibility considerations.
