---

### PROFESSIONAL SUMMARY

Software Engineering student (BSc in progress) with hands-on experience building full-stack web applications and responsive UIs. Strong fundamentals in Object-Oriented Programming (OOP), data structures, and RESTful APIs. Practical experience with backend services, relational databases (MySQL), and frontend component development. Quick to learn and eager to apply AI-assisted engineering tools to accelerate development.

### TECHNICAL SKILLS

---

- Languages: Java, JavaScript, PHP, SQL; currently learning C# and TypeScript
- Frontend: React.js, HTML, CSS, Tailwind, Framer Motion, GSAP; familiar with Angular concepts
- Backend: RESTful APIs, Express/Node, Hibernate, ASP.NET Core (learning)
- Databases: MySQL, MongoDB, SQL queries, DBMS concepts, relational schema design
- Tools & Practices: Git, GitHub, Visual Studio Code, Visual Studio, Agile, CI/CD concepts, code review
- AI-assisted dev: Experience exploring ChatGPT and GitHub Copilot for coding and testing workflows

### EDUCATION

---

**BSc Software Engineering** — Birmingham City University (expected 2027)

**Advanced Course in Graphic Design & UI/UX** — Academy Of Graphics (2023)

**Advanced Level Exams (Physical Science – C, C, S)** — D S Senanayake College (2023)

**Ordinary Level Exams (9A's)** - D S Senanayake College (2020)

### SELECTED PROJECTS

---

#### [Modern E-Commerce](#) (PHP) — Frontend & UX

- Developed a modern eCommerce website for an electronics store featuring original design, smooth scrolling, loaders, and an intuitive user experience with a PHP backend.

#### [Fashion E-Commerce](#) — (Java, MySQL - Hibernate)

- Developed a premium fashion e-commerce platform using Java, MySQL, and Hibernate, creating a fast, stable, and scalable online shopping experience with category filtering, secure checkout, and optimized product management.
- Designed a fully responsive user interface with fast-loading high-quality visuals and built an admin dashboard for real-time order tracking and inventory management, improving usability for both customers and store owners across all device sizes.

#### [Creative Portfolio](#) (GSAP) — Frontend (React)

- Developed a modern, visually engaging personal portfolio website showcasing skills, projects, and personality as a creative developer, featuring a contemporary user interface, animations, and fully responsive design to ensure

seamless experience across devices while emphasizing interactivity and creativity to reflect technical skill and creative thinking

#### [Hotel WordPress Site](#)

- Built a fully responsive WordPress website for a 5-star hospitality and banqueting venue, demonstrating expertise in WordPress theme customization and plugin integration
- Implemented custom page builder layouts using Elementor/Gutenberg to create dedicated sections for events, venues, gallery, reviews, and enquiry forms optimizing for conversions
- Structured multi-page experience with clean, semantic HTML and responsive CSS ensuring seamless experience across all devices (mobile, tablet, desktop)
- Configured domain registration, DNS settings, and hosting deployment ensuring proper site accessibility and email routing

#### [Software Agency Website](#)

- Developed a comprehensive UI/UX system with modern typography, neon-inspired branding, project showcases, testimonials, and service sections, enhancing visual hierarchy, consistency, and front-end usability through organized design systems and collaborative workflows
- Created and prototyped a futuristic agency portfolio website in Figma, utilizing Auto Layout, components, variants, grids, reusable styles, and interactive prototyping to develop a responsive and visually engaging user interface

#### [Virtual Event Platform](#)

- Developed a high-fidelity mobile interface for a real-time event sharing application, focusing on a clean, modern aesthetic with a consistent "Mac Dark" inspired color palette.
- Optimized user flows for event discovery and creation, implementing a streamlined "Quick Menu" and QR scanning functionality to enhance accessibility and user engagement.

#### [GitHub Projects](#) - More Awesome Projects

#### [Portfolio Link](#) - Personal Portfolio Website

### RELEVANT EXPERIENCE & RESPONSIBILITIES

---

- Implemented features and resolved bugs across frontend UI and backend APIs in collaborative teams.
- Built and consumed REST APIs; prepared and validated data for backend features and testing.
- Designed responsive UI components and collaborated on UI/UX decisions with stakeholders.
- Performed testing, debugging, and troubleshooting across stacks.
- Participated in Git-based code reviews and Agile ceremonies.

### KEY ACHIEVEMENTS

---

- Delivered production-ready e-commerce features with measurable performance improvements.
- Implemented admin dashboard features enabling real-time order tracking and simplified inventory flows.

### WHY I FIT

---

- Solid foundations in OOP, data structures, and software engineering principles from coursework and projects.
- Practical backend API and relational DB experience transferable to C#/.NET development.

- Frontend component experience and ability to learn Angular/TypeScript quickly.
- Familiar with VS Code, Git, Agile, REST APIs, and CI/CD concepts.
- Enthusiastic about AI-assisted development and validation of AI-driven features.

## CERTIFICATIONS

---

React Essential Training, LinkedIn Learn (2025)

Web Design & WordPress Development (2025)
